

ZYA Automation

COMPANY PROFILE

Innovative Automation for All: Big or Small.

About ZYA

ZYA Automation is a software company which drives business solutions through custom and creative tools, systems and platforms. We design practical systems that reduce manual work, improve operational visibility, and give companies newfound power to elevate their commercial performance. Our focus is on solutions that are tailored to the client, grounded in real operations, and built to support measurable business outcomes.

Our company is based in Jeddah, Saudi Arabia, serving businesses across the Kingdom and the wider GCC.

Our Vision

To become a leading provider of custom software solutions for businesses in Saudi Arabia and the wider region.

Our Mission

To help businesses improve efficiency, visibility, and growth through practical software solutions, automation and AI systems no matter what size.

Services

- **Agentic Workflow Automation**

Custom AI-driven workflows that automate repetitive and multi-step business processes, reducing manual workload and improving operational consistency.

- **Business Analytics & Dashboards**

A business dashboard and analytics environment designed to provide KPI tracking, performance visibility, and clearer decision-making.

- **Marketing Automation**

Automated marketing systems that plan, generate and distribute content across channels, ensuring consistent brand presence.

Services

+ Digital Transformation

Integration of systems, data, and tools to create a unified digital ecosystem that improves efficiency, visibility, and decision-making across the business.

+ Custom Software development/deployment

Design and deployment of tailored software solutions built around your operations, enabling scalable systems, seamless integrations, and full operational control.

+ Process Automation in Business

Automation of repetitive and multi-step processes through intelligent workflows, reducing manual effort while improving speed, accuracy, and consistency.

+ ZYA Suite

Products

A dashboard platform for business reporting, analytics, KPI tracking, and executive visibility across core operations.
